

# INSTALLATION INSTRUCTIONS

Accessory  
**FULL NOSE MASK**  
P/N 08P35-SNA-100B

Application  
**2011 CIVIC**  
**4-DOOR**

Publications No.  
**All 44394**

Issue Date  
**AUG 2010**

**Put this information in the glove box with the vehicle owner's manual.**

## PARTS LIST

Mask (hood section)

Mask (bumper section)

2 Clips

2 Snap-screws

Elastic cord

Storage bag

## TOOLS AND SUPPLIES REQUIRED

Stubby Phillips screwdriver

Flat-tip screwdriver

Scissors

## INSTALLATION

### NOTE:

- Make sure the vehicle and the nose mask are clean and completely dry before installation. If moisture under the mask is allowed to dry, it may cloud the paint. If the mask gets wet, remove it and allow it to air-dry completely.
- Make sure any repainted surfaces are cured.
- Make sure the hood and nose of the vehicle have been waxed with a high-quality paste wax.
- Make sure to install the nose mask securely. If the nose mask starts to flap or comes loose while driving, safely pull off the highway, stop the vehicle, and secure or remove the mask.

### Displaying the Front License Plate

If your state law requires the display of both license plates, cut out the piece of the bumper section that covers the front license plate:

- Face the inside of the mask toward you.
- Carefully cut out the license plate section with scissors at the top seam, and remove the overcast stitching.

## Installing the Hood Section

1. Open the hood. Fit the corners of the mask around the hood. Adjust the mask so that it fits smoothly over the edges. Attach the S-hooks to the hood.

## Installing the Bumper Section

2. Remove the clip from the left front fender.

3. Install one new clip with a snap-screw into the hole where you removed the clip, and tighten the snap-screw.

4. Repeat steps 2 and 3 to install a snap-screw on the right side of the vehicle.
5. Slip the pocket of the mask bumper section onto the front corner of the fender.

6. Attach the snap on the mask to the snap-screw you installed in step 3.
7. Repeat steps 5 and 6 on the right side.

8. Insert the tabs between the headlight, the front bumper, the fender, and the front grille.

9. Pull the mask toward the wheelwell, smooth out any wrinkles, and attach the five plastic hooks to the fenderwell, then bend the metal tab around the fenderwell. Repeat on the other side.

10. Attach the four S-hooks to the inside top edge of the bumper grille opening.

11. Insert the four tabs as shown.

12. Attach the two S-hooks to the bottom inside edge of the bumper grille opening.

13. Route the elastic cord through the ten loops on the bottom of the mask. Attach one S-hook to the bottom edge of the bumper on one side. Stretch the cord, then attach the other S-hook to the bottom edge of the bumper on the other side.

14. Put these instructions, and the two clips removed in step 2, in the glove box.

## CLEANING THE NOSE MASK

Use a sponge or cloth and a solution of mild liquid dishwashing soap and water to clean the vinyl and the flannel backing. Rinse the mask completely with clean water, and hang it to dry out of direct sunlight. Make sure the mask is completely dry before you reinstall it.
